**SRS Energy Debuts Solé Power Tile™
at 2009 American Institute of Architects Conference**
– Solar-Powered Roofing Tile Exhibited in Partnership with US Tile –

PHILADELPHIA, April 30, 2009 – SRS Energy, a leading developer of sustainable solar roofing systems, launched **Solé Power Tile™**, the first building-integrated photovoltaic (BIPV) roofing product designed for curved roofing systems, at the **American Institute of Architects 2009 National Convention and Design Exposition**. The convention took place April 30, 2009 through May 2, 2009 at the Moscone Center in San Francisco. SRS Energy exhibited Solé Power Tile™ in partnership with US Tile, the largest manufacturer of clay tile in the United States and recently acknowledged for their Cradle to Cradle certification.

“Sustainability and green living is high on the consumer agenda for 2009, with so many homeowners looking to save money and also be eco-conscious,” said Marty Low, CEO of SRS Energy. “SRS Energy is excited to introduce Solé Power Tile™ to the architectural world. With green building playing such a significant role in the Obama administration’s economic stimulus efforts, it could not have come at a better time.”

SRS Energy Debuts Solé Power Tile™
at 2009 American Institute of Architects Conference (cont.)
– Solar-Powered Roofing Tile Exhibited in Partnership with US Tile –

SRS Energy's Solé Power Tile™ system blends seamlessly with several styles of US Tile's clay tiles, providing energy without unsightly solar panels, thus preserving a roofline's aesthetics. The partnership between US Tile and SRS Energy makes going solar easy by integrating the clay tile roof purchase with a BIPV system, enabling businesses or homeowners to go green and generate savings.

The Solé Power Tile™ system employs cutting-edge thin film solar technology, valued for generating more energy than comparable products in the harsh roofing environment, and is backed by a full product warranty that ensures reliability for both design professionals and their clients.

“Most attractive of all is the ‘eco-nomics’ associated with Solé Power Tile,” Low said. “Choosing to upgrade to a sustainable roof from SRS Energy puts energy savings in homeowners’ pockets immediately and delivers compelling long-term returns.”

US Tile is currently launching the product in select West Coast markets. For more information, visit www.srsenergy.com or www.ustile.com.

About SRS Energy

SRS Energy develops and manufactures premium solar roofing tiles designed to integrate with traditional roofing products. Through partnerships with roofing manufacturers, SRS Energy enables seamless solar upgrades that maintain the aesthetics, integrity and simplicity of conventional roofing purchases while delivering sustainable energy savings. SRS Energy is headquartered in Philadelphia, PA. For more information, visit www.srsenergy.com

About US Tile

US Tile is the nation's leading manufacturer of all-natural, durable, 100-percent recyclable, environmentally-friendly clay roofing products. Featuring the widest range of profiles available, including Spanish Mission, Shake and Slate, US Tile clay roofing products are ideal for any aesthetic application nationwide. Made from the earth, US Tile's natural clay roofing products feature the inherent long-term durability of clay and are covered by an industry-leading lifetime warranty that includes no-fade coverage. US Tile is a division of Boral Industries and was founded in Corona, California in 1973. For more information, visit www.ustile.com.
